

The UCView Digital Signage Appliance is a fully integrated hardware and software solution for providing web-based management and media distribution to digital signage media player networks.

One Digital Signage Appliance seamlessly distributes: Live TV, web pages, Flash media, PowerPoint presentations, RSS feeds and multiple video, image and audio formats.

With no software to install or network modifications to perform, setting up a UCView Digital Signage Appliance is simple and hassle free.

- One UCView500 Appliance can control as many as 500 media players, operating anywhere in the world.
- Self-contained hardware and software solution that minimizes maintenance and serpentine installation/administration issues.
- Compatible with Intranet, Internet and V-LAN connections.
- Web-based administration: Manage campaigns, content, layouts and displays from any web-enabled device, anywhere in the world.
- Cluster multiple Server Appliances to increase capacity and availability. Installing additional units is as simple as installing the first one.
- Schedule content delivery on the fly or weeks in advance.
- Unlike software-only solutions, the UCView Digital Signage Network increases system performance by centralizing the process and management to multi-user enterprise environments.
- Updates and fixes are delivered automatically with no additional administration.
