

DIGITAL SIGNAGE FOR GOVERNMENT

OPTIMIZE COMMUNICATION AND WAIT TIMES IN DENSE AND ACTIVE GOVERNMENT FACILITIES

Manageable Foundation for Your Digital Signage Network

UCView's digital signage solutions are perfect for government installations where effective public interaction must be adaptable and fiscally responsible. Digital signage increases awareness and efficiency, provides information, and inspires action for civil causes, with minimal cost and maintenance outlays. Government institutions realize the power and benefits of digital signage products, and governments worldwide use digital signage for meetings, events, employee messaging, public information, emergency alerts and even training.

Digital signage technology can help government agencies and non-government organizations (NGOs) effectively and efficiently improve communication with citizens and clients in their facilities. Digital signage installations are already showing clear results, such as events schedules in libraries and museums, or promoting government-sponsored events. Public displays can deliver new messages, services, opportunities, bulletins, and advisories - in one language or many.

▶ Messaging and Information

Deliver inspirational messages, holiday notices, news, and weather as well as event information to public service employees and administrators.

▶ Delivery of Relevant Content

Use small screen outside an information booth to provide after-hours information to reduce staff costs.

▶ Cost Reduction

Save money on costly print media changes with digital signage that can be updated or altered with a few mouse clicks.

Advantages in Digital Signage for Government Facilities

Bulletin Boards

Use UCView's signage platform to display and promote event updates, special occasions, welcome boards or product news.

Provide announcements, directions, and alerts for all your patrons, employees and administrators.

Wayfinding & Directory

Digital Signage provides a wayfinding system that can be mounted in high-traffic spaces, or blasted to patrons's mobile devices.

Help guide your clients and patrons to their destinations in legislative and government buildings.

Que Systems

Educate, entertain, and inform citizens waiting in long lines at busy locations such as the DMV and Social Security Administration offices, local courthouses, and public transit stands.

Help optimize guest turnover and reduce guest's stress in your establishment.
