

## UCView Single-Sign-On

Digital Signage

- ▶ Single sign-on (SSO) lets users access authorized network resources with one login. You validate usernames and passwords against your corporate user database or other client app rather than UCView managing separate passwords for each resource. . We support all known IdPs - Google Apps, ADFS, Okta, OneLogin, Azure AD, Salesforce, Shibboleth, Centrify, Ping, RSA, IBM, Oracle, etc.SAML Single Sign on (SSO) acts as a SAML 2.0 Service Provider and securely authenticate users with your SAML 2.0 Identity Provider.
- ▶ Benefits of SSO
  - ▶ **Reduced administrative costs**—With SSO, users memorize a single password to access network resources and external apps and UCView Digital Signage. When accessing UCView from inside the corporate network, users log in seamlessly and aren't prompted for a username or password. When accessing UCView from outside the corporate network, the users' corporate network login works to log them in. With fewer passwords to manage, system admins receive fewer requests to reset forgotten passwords.
  - ▶ **Leverage existing investment**—Many companies use a central LDAP database to manage user identities. You can delegate UCView authentication to this system. Then when users are removed from the LDAP system, they can no longer access UCView . Users who leave the company automatically lose access to company data after their departure.
  - ▶ **Time savings**—On average, users take 5–20 seconds to log in to an online app. It can take longer if they mistype their username or password and are prompted to reenter them. With SSO in place, manually logging in to UCView is avoided. These saved seconds reduce frustration and add up to increased productivity.
  - ▶ **Increased security**—All password policies that you've established for your corporate network are in effect for UCView. Sending an authentication credential that's only valid for a single time also increases security for users who have access to sensitive data.
  - ▶ **Single Logout** With single logout (SLO), your users can log out from a single application and be automatically logged out from all connected apps.
- ▶ Features of UCView/ Single Sign On addon:
  - ▶ Auto-create users in UCView
  - ▶ Assign default role to Auto-created users
  - ▶ Login button on the Login page
  - ▶ Auto-Redirect to IdP
  - ▶ Support for Multiple SAML IDPs\*
  - ▶ Datacenter support
- ▶ SSO Integration Cost
  - ▶ SSO SaaS Integration cost is \$95 Per Month.
