UCView Versatile Signage Solution

WHY CHOOSE UCVIEW?

1 We offer you the flexibility between hosting your own server in an on-premise solution or using our cloud platform.

2 You can use any Chrome,Linux, Windows or Raspberry Pi based hardware as well as Samsung's latest Smart TVs to run our signage software.

3 Collaborate across multiple departments and manage user permissions down to an individual screen zone.

4 Choose from over 100 free signage apps that you can use in your playlist with just a click of a button. UCView is the home of the world's largest signage app store.

5 A myriad of helpful and innovative features such as player health monitoring, ad tracking reports, global alerts, day-parting, GPS triggering and more!

ABOUT UCVIEW

UCView is a leading provider of digital signage software worldwide, offering world-class digital signage SaaS and servers based (with load balancing) and content management software that is reliable, simple to use, and cost-effective to operate. Our company's mission is to enable the business convergence of digital display owners, advertisers and consumers. There is no need to deal with complicated software installation or network modifications.

Our signage solution caters supports small, medium and enterprise digital signage networks across the spectrum. The UCView portal allows customers to manage large digital signage networks and provide departments or 3rd party companies, like advertisers or location owners, to interact with their digital signage network.
